TO WHO IT MAY CONCERN:

Advance Stucco Design (ASD) has performed work for me for the past 15 years under my duties with both Palace Construction and my former employer. ASD has consistently provided quality work at fair market price. Additionally, ASD has maintained this performance on projects ranging from \$500 to \$2M.

ASD has consistently provided timely response, quality workmanship, fair market pricing, and most importantly, approached the project as a Team Member. ASD has routinely aided in locating and employing subcontractors to provide services for work that connects to their systems when I found myself in a bind.

Palace Construction Company and I personally recommend Advanced Stucco Design for Repair and New Construction projects.
